

Special Issue

The Biological Impact of Nanomaterials: From Safety Studies to Applications

Message from the Guest Editors

This Special Issue aims to provide an overview of nanomaterial interactions with cells and highlight the importance to understand the correlations and linkages between their unique physicochemical properties (e.g., composition, structure, dimensions, functionality, etc.) with their applications and biological impacts. Special emphasis will be given to the understanding of the potential repercussions of these materials on human health and environments. Therefore, from this perspective, we would like to invite you to submit research papers or reviews articles discussing and summarizing the state-of-the-art and the most recent advances in this research field, covering material synthesis and applications as well as safety assessment evaluations.

Guest Editors

Dr. Neus Feliu

Dr. Luca Guerrini

Dr. Nicolás Carlos Pazos Pérez

Deadline for manuscript submissions

closed (30 April 2021)

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
