

## Special Issue

# Carbon Based Hybrid Nanomaterials

### Message from the Guest Editor

This Special Issue will attempt to cover cutting-edge research, and several applications within the fields of energy, microelectronics, biomedicine, and beyond, while at the same time presenting market opportunities for carbon-based nanoscale materials and devices in the future. In a parallel manner, various synthetic routes for carbon-based nanomaterials will be presented, including chemical and physical routes, top-down (e.g., exfoliation), and bottom-up (e.g., chemical vapor deposition). This Special Issue will also attempt to present the progress in the synthesis, preparation, and characterization of various hybrids based on carbon nanotubes, graphene, graphene oxide, and their derivatives, with various inorganic components such as nanosized oxides, noble metallic nanoparticles, normal metals, non-graphene nanocarbons (carbon nanotubes or carbon nanofibers), semiconductor nanoparticles, and inorganic complexes (SMMs, spin crossover nanoparticles).

### Guest Editor

Dr. Vassilis Tangoulis

Department of Chemistry, University of Patras, Patra, Greece

### Deadline for manuscript submissions

closed (20 June 2019)

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

---

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of  
Birmingham, Birmingham B15 2TT, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General  
Chemical Engineering)
