Special Issue

Nanotechnologies and Nanomaterials: Selected Papers from CCMR 2019

Message from the Guest Editors

The 2019 Collaborative Conference on Materials Research (CCMR) will take place in Goyang Gyeonggi (South Korea), 3–7 June, 2019. Materials research, the science and technologies for the generation, processing and fabrication of materials, is where the disciplines merge and where they diverge into a remarkable range of applications, from electronics to health care that touch, or will soon touch, the lives of millions. The CCMR series aims to enable the technological developments in the various fields of materials and to further the goal of unifying materials research in engineering, physics, biology, materials science, as well as chemistry and neuroscience. This Special Issue, "Nanotechnologies and Nanomaterials: Selected Papers from CCMR 2019", will contain the accepted papers presented during 2019 CCMR, related to 'nanotechnologies and nanomaterials.' The selected papers will include nano-materials preparation, modification, characterization, properties and the applications of any compositions and morphologies, including carbon nanotubes, graphene, metal, oxide materials, polymer, molecules, nanoparticles, nanowires, quantum dots, etc.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones
School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
