Special Issue

Environmental Applications and Implications of Nanotechnology

Message from the Guest Editor

This Special Issue seeks submissions that address environmental applications and implications of nanotechnology. To make green nanotechnology, this Special Issue will focus on environmental applications of engineered nanomaterials (ENMs) and biosynthesized nanomaterials (BNMs) such as inorganic nanoparticles synthesized by microorganisms, fungi, algae and plants. At the same time, we will also cover difference between ENMs and BNMs in terms of their environmental applications, behavior and effects including interactions between these nanomaterials and natural organic matter and their physicochemical transformation in aquatic environment.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones
School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
