

# Special Issue

## Functional Magnetic Oxides and Composites

### Message from the Guest Editor

I am writing to invite you submit a paper to the Special Issue of *Nanomaterials* “Functional Magnetic Oxides and Composites”. Low-dimensional functional magnetic materials with controllable magnetic, electrical, optical, and microwave properties are attracting great attention nowadays. Oxide magnetics and composites based on it are one of the most frequently investigated subjects and are widely being used on practice materials. We look forward to receiving your contribution to our Special Issue, which aims to help in the development of new technologies toward making our world a better place.

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering )
