

Special Issue

Nanotechnology for Electronic Materials and Devices

Message from the Guest Editors

Today, nanomaterials for electronic devices are of growing interest, since their reduced dimensionality can be associated with unique properties which are currently finding rapid application in many technological areas (such as high-frequency electronics, power devices, displays, energy conversion systems, energy storage, photovoltaics, and sensors). This Special Issue will cover the most recent developments on nanomaterials and nanotechnologies for electronic devices and sensors, from synthesis to advanced characterization, up to device fabrication.

- Nanoscaled material and their properties: nanostructured thin films (oxides, nitrides), nanocomposites, nanoparticles, and 2D materials (graphene or MX_2 $M = Mo, W$, etc. and $X = S, Se, Te$, etc.);
- Synthesis techniques for nanomaterials and thin films: processes and novel approaches;
- Advanced nanoscale characterization techniques (surface analytical and scanning-probe methods, electron beam methods, optical methods, X-ray methods);
- Applications of nanostructured materials and nanotechnologies to electronic devices (high frequency and power devices, photovoltaics, sensors, etc.).

Welcome your contribution!

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of
Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General
Chemical Engineering)
