

## Special Issue

# Nanoscience and Nanotechnology for Electronics

### Message from the Guest Editor

Nanoscience and nanotechnology are already crucial for electronics. However, taking full advantage of nanomaterials requires overcoming many challenges. Nanodevices are unavoidably more complex to fabricate, model, characterize, and assemble into functional systems. This Special Issue of *Nanomaterials* will cover challenges and opportunities of Nanoscience and Nanotechnology for Electronics. The format of articles includes full papers, communications, and reviews. Potential topics include but are not limited to:

- Nanomaterials for electronics;
- Nanomaterials for bioelectronics;
- Nanomaterials for sensors, actuators, and transducers;
- Nanomaterials for flexible/wearable systems;
- Quasi-1D nanostructures (nanowires, carbon nanotubes, etc.) for electronics;
- 2D electronics (graphene, MoS<sub>2</sub>, 2D heterostructures, etc.);
- Nanogenerators (piezoelectric, triboelectric, etc.);
- Nanotransducers (piezoelectric, etc.);
- Modeling of nanomaterials for electronics;
- Synthesis of nanomaterials for electronics;
- Characterization of nanomaterials for electronics.

### Guest Editor

Dr. Christian Falconi

Department of Electronic Engineering, University of Rome Tor Vergata,  
00133 Roma, Italy

### Deadline for manuscript submissions

closed (31 October 2022)

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

---

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of  
Birmingham, Birmingham B15 2TT, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General  
Chemical Engineering )
