RNA Interference and Non-

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely

coding RNAs, University of
Texas MD Anderson Cancer
Center, Houston, TX 77030, USA

stems from the many scientific contributions from extremely
diverse horizons, studying gene silencing in plants, position
effect variegation in drosophila or quelling in fungi. This field
has achieved maturity, but a lot remains to be discovered!
Our aim is to publish manuscripts from all horizons that will
have a high impact on the development of the field. Let's
have fun and wish Non-Coding RNA a long and rewarding life!

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder**, and **other databases**.

Journal Rank: **CiteScore - Q1 (Genetics)**
