Message from the Guest Editors

Dear Colleagues,

The majority of the transcriptome in higher eukaryotes is not translated into functional proteins. Thus, non-coding RNA now holds a major regulatory role in shaping the phenotypic complexity. This Special Issue is focused on, but not limited to, the variations in expression, post-transcriptional modifications, structure, etc., of different classes of non-coding RNAs and their possible role in health and disease. Both reviews and original research articles are welcome.

For further reading, please visit the [*Special Issue website*](#).

Best regards,

Dr. Gianpiero Di Leva
Dr. Arijit Mukhopadhyay

Message from the Editor-in-Chief

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely diverse horizons, studying gene silencing in plants, position effect variegation in drosophila or quelling in fungi. This field has achieved maturity, but a lot remains to be discovered! Our aim is to publish manuscripts from all horizons that will have a high impact on the development of the field. Let's have fun and wish *Non-Coding RNA* a long and rewarding life!

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder,** and **other databases.**

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics*)
