

## Topical Collection

# The Non-Coding RNA Journal Club: Highlights on Recent Papers

### Message from the Collection Editor

The number of papers dealing with new biochemical activities or new biological functions of non-coding RNAs published in recent years has indeed exploded. A simple search for 'non-coding RNA' in Pubmed on 30 July 2019 yielded 205,154 articles, over 70% of which were published in the last 10 years. Every researcher in this field knows that he has something to learn and can discover new ideas, new concepts, or new tools from studies made in models others than the ones used in its lab. The Scientific Board of *Non-Coding RNA* publishes here its highlights. With this Topical Collection, we aim to collect a selection of the most interesting papers published recently in the non-coding RNA field. We hope we will tease your curiosity and encourage you to read full papers outside of your research area that you may not have read otherwise. Prof. Dr. Georges A Calin

## About the Journal

### Message from the Editor-in-Chief

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely diverse horizons, studying gene silencing in plants, position effect variegation in *Drosophila* or quelling in fungi. This field has achieved maturity, but a lot remains to be discovered! Our aim is to publish manuscripts from all horizons that will have a high impact on the development of the field. Let's have fun and wish *Non-Coding RNA* a long and rewarding life!

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q1 (Genetics)
