Special Issue

Women's Special Issue Series: Worldwide Advances in Noncoding RNA Research

Message from the Guest Editor

This Special Issue is part of the MDPI journal initiative to promote and support the contributions of women in research. Its goal is to showcase the scientific achievements of women across all areas of non-coding RNA research. Non-coding RNAs have emerged as key regulators of gene expression and play pivotal roles in diverse biological processes as well as in the development of many diseases. We warmly invite researchers worldwide to contribute to this Special Issue, covering any aspect of non-coding RNA research. Both original research and review articles are welcome. For this Special Issue, we especially encourage submissions of research led by female scientists. Nevertheless, submissions from all authors are warmly welcomed, regardless of gender.

Guest Editor

Prof. Dr. Ling Yang

Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine, Temple University, Philadelphia, PA 19140, USA

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely diverse horizons, studying gene silencing in plants, position effect variegation in drosophila or quelling in fungi. This field has achieved maturity, but a lot remains to be discovered! Our aim is to publish manuscripts from all horizons that will have a high impact on the development of the field. Let's have fun and wish *Non-Coding RNA* a long and rewarding life!

Editor-in-Chief

Prof. Dr. George A. Calin

Department of Translational Molecular Pathology, Center for RNA Interference and Non-Coding RNAs, University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q1 (Genetics)
