

Special Issue

Advances in Imaging-Based NDT Methods

Message from the Guest Editor

This Special Issue's focus is on the advancements of imaging based non-destructive testing and evaluation (NDT&E) methods for inspection of various metals, semiconductors, composites and biomaterials. The main focus is given to widely used non-destructive testing and evaluation methodologies and associated data processing schemes for inspection of various industrial and biomaterials. Topics of interest This Special Issue on NDT&E focuses on both laboratory and field applications, including but not limited to the following:

- Ultrasonic Testing
- Radiographic Testing
- Thermographic Testing
- Optical Testing
- Eddy Current Testing
- Magnetic Particle Inspection
- Liquid Penetrant Examination
- Signal/Image/Video Processing techniques for improving the sensitivity and resolution for visualization of surface/subsurface/volumetric defects.
- Non-destructive Testing/Non-invasive Inspection of Biomaterials
- Data fusion for NDT&E.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Fabio Tosti

1. School of Computing and Engineering, University of West London, Room BY.03.19, St. Mary's Rd., Ealing, London W5 5RF, UK
2. The Faringdon Centre for Non-Destructive Testing and Remote Sensing, University of West London, Room BY.GF.015, St. Mary's Rd., Ealing, London W5 5RF, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.8 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
