

## Special Issue

# Molecular and Cellular Research of Neuroprotection and Neurodegeneration

### Message from the Guest Editor

This Special Issue aims to present cutting-edge research exploring the molecular and cellular pathways involved in neuroprotection and neurodegeneration, with a particular emphasis on signal transduction mechanisms. We invite contributions that investigate signal transduction pathways involved in, but not limited to, the following: Synaptic signaling and plasticity; Oxidative stress and mitochondrial dysfunction; Inflammatory responses in the central nervous system; Therapeutic targets for Alzheimer's disease; Therapeutic targets for Parkinson's disease; Apoptosis and autophagy regulation in neurons; Protein aggregation and degradation pathways; Neurotrophic signaling and growth factor responses; Calcium homeostasis and excitotoxicity; New insights regarding different signaling pathways that can be involved in neurodegenerative diseases.

### Guest Editor

Dr. Nidhi Puranik

Department of Life Sciences, Yeungnam University, Gyeongsan, Republic of Korea

### Deadline for manuscript submissions

30 January 2026

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Junji Yamauchi

1. Laboratory of Molecular Neurology, Tokyo University of Pharmacy and Life Sciences, Tokyo, Japan
2. Department of Pharmacology, National Research Institute for Child Health and Development, Tokyo, Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

##### Journal Rank:

JCR - Q2 (Clinical Neurology)
