

## Special Issue

# Migraines and Beyond: Advances in the Pathogenesis and Treatment of Chronic Headache Disorders

### Message from the Guest Editor

Migraine and headache are highly prevalent common diseases; however, the pathogenesis of these primary headache disorders has not been completely revealed. Recent advances and clinical applications of CGRP-blocking therapies have provided great advances for both basic and clinical research of headaches. We are pleased to invite you to contribute to this Special Issue. This Special Issue aims to collect cutting-edge findings on migraine. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: molecular pathophysiology, imaging, medical therapy, neuromodulation, animal studies, and clinical studies.

- migraine
- headache
- molecular marker
- imaging
- pathology
- CGRP
- medical treatment
- neuromodulation

---

### Guest Editor

Prof. Dr. Yasushi Shibata  
Faculty of Medicine, Mito Medical Center, University of Tsukuba,  
Tsukuba, Japan

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Junji Yamauchi

1. Laboratory of Molecular Neurology, Tokyo University of Pharmacy and Life Sciences, Tokyo, Japan
2. Department of Pharmacology, National Research Institute for Child Health and Development, Tokyo, Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

##### Journal Rank:

JCR - Q2 (Clinical Neurology)
