

## Special Issue

# The Neurogenetics of Degenerative Disorders

### Message from the Guest Editor

In the last ten years, our knowledge of the genetic basis of neurodegenerative diseases has significantly advanced. This Special Issue will revisit the neurogenetics of several of these conditions, in order to summarize the molecular studies that are available and to help the clinician to choose the correct test that should be performed in a given condition. The conditions that will be discussed here include dementias, Parkinsonisms, epileptic encephalopathies, ataxias, spastic paraparesis, and motor neuron disorders.

---

### Guest Editor

Dr. Daniele Orsucci

Unit of Neurology, San Luca Hospital, 55100 Lucca, Italy

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Junji Yamauchi

1. Laboratory of Molecular Neurology, Tokyo University of Pharmacy and Life Sciences, Tokyo, Japan
2. Department of Pharmacology, National Research Institute for Child Health and Development, Tokyo, Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

##### Journal Rank:

JCR - Q2 (Clinical Neurology)
