Special Issue

Biomarkers of Alpha-Synuclein Pathology

Message from the Guest Editor

Alpha-synuclein (a-syn) plays a key role in the pathology of Parkinson's disease (PD), dementia with Lewy bodies (DLB), Multiple system atrophy (MSA), and other diseases. However, we are still short of biomarkers for alpha-synuclein pathology and its progression in living people. There are yet no cures for these diseases and biomarkers that can direct future therapies are urgently needed. This special issue aims to gather studies of potential biomarkers of a-syn pathology in PD, DLB, MSA, and related diseases with emphasis on diagnostic and prognostic value, and the use of non-invasive patient samples.

About the Journal

Message from the Editor-in-Chief

NeuroSci (ISSN 2673-4087) is an international, peer-reviewed open access journal focusing on neurology and neuroscience. The journal publishes comprehensive reviews, original research papers and high-quality communications. Our aim is to encourage scientists to publish their novel findings and concepts in fundamental and clinical neuroscience as much detail as possible. We invite you to read recent articles published in NeuroSci and consider publishing your next paper with us.

Editor-in-Chief

Dr. François Ichas

Institut des Maladies Neurodégénératives, CNRS et Université de Bordeaux, UMR 5293, Bordeaux, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PMC, PubMed, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).
