

## Special Issue

# Neuroinflammation in Ischemic Stroke

### Message from the Guest Editor

Globally, ischemic stroke is one of most common causes of death and long-term disability in adults. We are pleased to invite you contributing any research work concerning with special attention to influences of immune cells, inflammatory cytokines and chemokines, oxidative stress, matrix metalloproteinases (MMPs), and other inflammation related pathological mediators in ischemic brain tissue damage and repair. This special issue aims to understand the role of inflammatory mediators in ischemic brain, which could help develop novel diagnostic, prognostic and therapeutic strategies for stroke patients. In this issue, original research articles, reviews and short communication are welcome, and manuscripts describing novel techniques or methods to reduce stroke injury are also considered. We sincerely look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*NeuroSci* (ISSN 2673-4087) is an international, peer-reviewed open access journal focusing on neurology and neuroscience. The journal publishes comprehensive reviews, original research papers and high-quality communications. Our aim is to encourage scientists to publish their novel findings and concepts in fundamental and clinical neuroscience as much detail as possible. We invite you to read recent articles published in *NeuroSci* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within ESCI (Web of Science), PMC, PubMed, EBSCO, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).
