

Special Issue

Patient-Centered Care with Chronic Diseases

Message from the Guest Editors

This Nursing Reports Special Issue will focus on patient-centered care with chronic diseases. One of the primary focuses is to identify the stakeholders in a health care model for Patient Centered Care on different chronic diseases. These models promote an improving satisfaction for patients, of the person's needs, with a notably increased adherence to the treatment with patient-centered communication. A patient-centered care model has been widely applied in several areas of clinical practice, with very positive results in the quality of care and patient satisfaction, emphasizing the individual needs of each one, and directing care in this same direction. Topics of interest for this issue include, but are not limited to the following:

- Investigation based on practice and personalized care approaches in healthcare;
- Patient-centered care models in many chronic diseases or other condition with long-term care;
- Studies investigating promotion of care;
- Nurse-led care;
- Intervention for the management of diseases;
- New approaches of patient-centered care;
- PROMs in chronic diseases

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief
