Special Issue

Nursing Digital Innovation: From Care Delivery to Professional Development

Message from the Guest Editors

This Special Issue aims to gather scientific contributions that explore the development, implementation, and evaluation of digital technologies in the nursing profession. Submissions that integrate technological innovation, gamification, creativity, and new digital approaches will be particularly relevant. The scope of this issue encompasses multiple dimensions of nursing, including clinical practice, education and professional development, care management and leadership, and applied research. With this initiative, we seek to stimulate reflection and knowledge production that reinforce nursing's role as a leading force in digital health innovation, contributing to more participatory, inclusive care that is focused on meaningful health and well-being outcomes.

Guest Editors

Dr. Carla Sílvia Fernandes

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC 3004, Australia

Author Benefits

High Visibility:
indexed within Scopus, ESCI (Web of Science), PMC, PubMed, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).

Journal Rank:
JCR - Q2 (Nursing) / CiteScore - Q2 (General Nursing)
