

Special Issue

Nursing Interventions to Improve Healthcare for Older Adults

Message from the Guest Editor

This *Nursing Reports* Special Issue will focus on nursing interventions to improve healthcare for older adults. These interventions are aimed at promoting patient satisfaction, addressing the unique needs of older adults, and improving adherence to treatment through effective nurse–patient communication. Nursing interventions in various settings have shown positive results in enhancing the care and well-being of older adults. This Special Issue aims to showcase studies that highlight the importance of tailored nursing interventions for older adults, demonstrating their impact on health outcomes and overall quality of life. Topics of interest include, but are not limited to:

- Investigation based on practice and personalized care approaches in older-adult healthcare;
- Nursing interventions to manage chronic diseases or conditions requiring long-term care in older adults;
- Studies promoting improved care for older adults;
- Nurse-led care initiatives;
- Innovative nursing interventions for the management of diseases in older adults;
- New approaches to personalized care for older adults;
- Patient-reported outcome measures (PROMs) in the context of older adult healthcare.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief
