

Special Issue

Health Questionnaires in Nursing

Message from the Guest Editors

Our aim is to highlight investigations into nursing questionnaires and surveys that include an initial approximation of psychometric properties, factorial analysis, exploratory analysis, etc., particularly in relation to nursing science. We propose an open space where researchers on health questionnaires and health surveys can explain the objectives of the questionnaires, cultural adaptation, validity, etc. The objectives pursued, the hypotheses proposed, and, above all, the nursing usefulness of these questionnaires should be explicitly reasoned. We invite you to publish your research on questionnaires with a psychometric or statistical approach. Research areas may include (but are not limited to) the following: nursing, psychometrics, sociology, medicine, and psychology.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC
3004, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PMC, PubMed, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Nursing) / CiteScore - Q2 (General Nursing)
