

Special Issue

Clinical and Rehabilitative Nursing in Chronicity

Message from the Guest Editors

The Special Issue "Clinical and Rehabilitative Nursing in Chronicity" seeks to advance the understanding and integration of nursing practices tailored for managing chronic illnesses. As the prevalence of chronic conditions like diabetes, cardiovascular disease, COPD, and cancer continues to rise globally, the role of clinical and rehabilitative nursing becomes crucial in enhancing patient outcomes. This issue will explore both clinical and community-based approaches, emphasizing patient-centered care, interdisciplinary collaboration, and the application of evidence-based practices to improve the quality of life for individuals with chronic diseases. This Special Issue is dedicated to exploring the evolving roles and interventions of nurses in chronic care, with a focus on improving patient outcomes and quality of life through integrated care models, self-management support, and evidence-based rehabilitation strategies. We welcome submissions that investigate innovative nursing approaches, interdisciplinary collaborations, patient education, and long-term care management, contributing to a more effective and holistic approach to chronic disease care.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC
3004, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PMC, PubMed, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Nursing) / CiteScore - Q2 (General Nursing)
