

Special Issue

Transforming Healthcare Delivery: Advances in Organizational Models of Nursing Care

Message from the Guest Editor

The organization of nursing care is a cornerstone of healthcare systems, influencing access, equity, and the overall quality of patient outcomes. This Special Issue invites contributions that explore how organizational innovation in nursing can support a digital, sustainable, and human-centered transformation of care. We particularly encourage submissions that examine the connection between technological advancement, environmental responsibility, and nursing leadership in shaping the future of healthcare delivery. We are pleased to invite you to contribute to this Special Issue entitled “Transforming Healthcare Delivery: Advances in Organizational Models of Nursing Care”, which aims to collect original research, reviews, theoretical contributions, and case studies addressing the development, implementation, and evaluation of novel care models in nursing practice. This topic aligns closely with the scope of *Nursing Reports*, which welcomes interdisciplinary and international contributions that advance knowledge in nursing science, education, practice, and system innovation. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC
