Research Innovations in Skin and Wound Care

Message from the Guest Editors

Research innovations in skin and wound care have made significant strides in recent years, revolutionising the way healthcare professionals approach the management of skin integrity and wound healing. Furthermore, the integration of digital health tools is transforming patient monitoring and education, allowing for personalised care strategies. As these innovations continue to emerge and interprofessional healthcare professionals are highlighted as being important, there is the potential to significantly improve patient outcomes, reduce healthcare costs, and enhance the overall quality of life for individuals affected by skin and wound conditions. This Special Issue on “Research Innovations in Skin and Wound Care” will provide a platform to highlight research projects focused on innovative solutions to the challenge of skin and wound care by healthcare professionals in hospital and community settings. This timely dialogue is highly relevant. As the prevalence of chronic wounds continues to rise due to factors such as diabetes, ageing populations, and increased surgical procedures, the need for advanced therapeutic solutions is more critical than ever.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC
3004, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PMC, PubMed, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).

Journal Rank:

JCR - Q2 (Nursing) / CiteScore - Q2 (General Nursing)
