Nutraceuticals for Cardiometabolic Diseases: Prophylactic and Therapeutic Research

Message from the Guest Editor

Cardiovascular diseases are the leading cause of death worldwide. A maladaptive diet and lifestyle are key contributors to the development of metabolic risk factors such as obesity as well as high blood pressure, high glucose, and high cholesterol levels, which are associated with the development of cardiometabolic diseases. Although prophylactics and therapeutics are available for prevention and treatment, there is a growing market of dietary supplements and nutraceuticals purporting to be of benefit against cardiometabolic diseases and related risk factors. This Special Issue is focused on nutraceuticals and supplements for the prevention and treatment of cardiometabolic diseases. Original articles and reviews aimed at understanding the molecular mechanisms that underpin the actions of nutraceuticals on cardiometabolic diseases are welcome.

About the Journal

Message from the Editor-in-Chief

The contemporary world is struggling with an aging population, which necessitates the design of diets that promote “healthy aging”. In this context, nutraceuticals, health-supportive substances, are significant, remaining in the focus of scientific interests and being continuously developed worldwide. The *Nutraceuticals* journal focuses on the research and development of all fields related to these substances. All types of articles are welcome, including reviews, original papers, and short communications.

Editor-in-Chief

Prof. Dr. Luisa Tesoriere

Department of Biological, Chemical and Pharmaceutical Sciences and Technologies, University of Palermo, 90123 Palermo, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.7 days after submission; acceptance to publication is undertaken in 3.2 days (median values for papers published in this journal in the first half of 2025).
