Message from the Guest Editors

Dear Colleagues,

In recent years, as the aging population increases, the health of bone and muscle is becoming more important. When osteoporosis and sarcopenia occur in the elderly, the incidence of fractures increases, which is an important causative disease that sharply reduces the quality of life for the rest of one's life. Therefore, interest in nutrients and healthy functional foods for bone and muscle has recently increased. However, too much information and misinformation caused by corporate advertisements is often floating around the Internet. The purpose of this Special Issue is to provide readers with accurate, valuable, and up-to-date information on nutrients for bone and muscle.

As the Guest Editors of this Special Issue on “The Role of Nutrition on Bone and Skeletal Muscle Health in Older Adults”, we hope to further contribute to this fascinating area of metabolism by inviting you to submit a manuscript to *Nutrients* to improve our knowledge regarding the role of macronutrients in bone tissue function and metabolism. Experimental research, systematic and meta-analyses, and narrative reviews are welcome.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
