### Message from the Guest Editor

Dear Colleagues,

Although nutrition has been studied for centuries, modern nutrition science is quite recent, accelerating after the beginning of the 20th century. In the specific context of cardiovascular disease (CVD), the complex interplay with nutrition has been a matter of great interest and investigation. Indeed, it has been clearly depicted that a dietary plan based, among others, on fruits, whole grains, vegetables, olive oil, and fish, avoiding trans and saturated fats, red meat, sodium, sugar-sweetened beverages, and refined carbohydrates, improves CV health. Accordingly, on top of pharmacotherapy, healthy dietary choices have been developed such as the Mediterranean diet and the Dietary Approaches to Stop Hypertension (DASH) diet. However, despite the increasing understanding of the contribution of eating decisions in primary and secondary CVD prevention, there are still several gaps in the evidence and conflicting information, especially for complex patients with comorbidities. The aim of this Special Issue is to summarize the current evidence on nutrition and CVD interaction and provide individualized recommendations aiming at cardiovascular health promotion.

Sciences, University of  
Connecticut, Storrs, CT 06269,  
USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
