Message from the Guest Editors

Cancer is one of the leading causes of morbidity and mortality worldwide. The diet and nutrition conditions of the individuals are modifiable risk factors in the development of several cancers and a predominant component in the recovery and effectiveness of the treatments. Cachexia management remains a challenge in clinical practice and malnutrition is accepted as a significant negative predictive and prognostic factor in all cancer patients. The importance of metabolic interactions within the tumours are crucial and the mechanisms by which dietary factors might increase or decrease therapeutic intervention are key factors to unravel the nutrition influences in cellular and molecular processes in cancer.

This Special Issue is committed to publishing original research articles on cancer nutrition-related intervention, diagnosis, and prevention.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación
Biomédica en Red Fisiopatología
de la Obesidad y la Nutrición
(CIBEROBN), Institute of Health
Carlos III, 28029 Madrid, Spain
2. Research Institute of
Biomedical and Health Sciences
(IUIBS), University of Las Palmas
de Gran Canaria, 35001 Las
Palmas, Spain
3. Preventive Medicine Service,
Centro Hospitalario Universitario
Insular Materno Infantil (CHUIMI),
Canarian Health Service, 35016
Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional
Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)
