Carbohydrate Metabolism in Health and Disease

Guest Editor:

Dr. Javier T. Gonzalez

Department for Health, University
of Bath, Bath BA2 7AY, UK

Deadline for manuscript
submissions:

closed (30 November 2017)

Message from the Guest Editor

Dear Colleagues,

Carbohydrate metabolism is a key aspect of health and optimal function in a variety of species, including humans. A primary alteration in major global diseases, such as cardiovascular disease and diabetes, is dysregulation of carbohydrate metabolism. Furthermore, certain disease outcomes may be impacted by the amount and type dietary carbohydrates consumed. Finally, carbohydrate availability is essential for optimal performance in many sporting events. We welcome the submission of manuscripts, either describing original research, or reviewing scientific literature on the topic of carbohydrate metabolism in health and disease.

Dr. Javier T. Gonzalez
