Message from the Guest Editors

Dear Colleagues,

A plethora of beneficial properties, including antioxidant, anti-inflammatory, antimicrobial and antiproliferative, have been associated to polyphenol-enriched food and plant byproducts, thus suggesting a possible role of these compounds in the prevention or treatment of several pathologies, such as neurodegenerative diseases, metabolic syndrome, diabetes, and cancer. Recent evidence has also highlighted the ability of some phenolics to boost antioxidant endogenous defenses, thus favoring health maintenance and infectious resilience.

Consequently, polyphenols appear to be interesting candidates for both pharmaceutical and nutraceutical applications. However, some pharmacokinetic issues, including reduced intestinal absorption and bioavailability, and rapid metabolic modifications, should be assessed to fully exploit their remarkable properties.

This Special Issue aims at collecting original articles and review papers evaluating the biological activities of plant polyphenols and phenolic-based plant byproducts, the mechanisms involved, and their clinical relevance review articles.

Dr. Antonella Di Sotto

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
