Message from the Guest Editors

Dear Colleagues,

Food labels are a tool to promote public health by providing information which allows consumers to make informed dietary choices. At the same time, food labels may represent a marketing tool and may influence consumers’ perception of food quality. This Special Issue welcomes original research and reviews of literature focusing on:

- The analysis of the nutrient profile of products with different characteristics reported on the food labels (including but not limited to nutrition and health claims, organic, gluten-free);
- The nutrient profile underlying FOP nutrition labels and their graphical design in different countries;
- The consumers’ perception, knowledge, and understanding of the information made on food;
- The impact of information on food labeling (e.g., front-of-pack information, serving size) on consumers’ willingness to pay and food choice;
- The attitudes, beliefs, perceptions, behavioral, and socioeconomic determinants regarding the use of food labels.

Special Issue

Editors-in-Chief

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the nutritional sciences.
Prof. Dr. Maria Luz Fernandez
Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.
Journal Rank: JCR - Q1 (Nutrition & Dietetics) / CiteScore - Q1 (Food Science)
