Message from the Guest Editor

The study of Immunonutrition, which focuses on the interactions between nutrition and immunity, has significantly intensified during the last decades. This is a relevant field that has raised the interest of many health professionals. Indeed, there is a relevant number of papers showing different effects of diverse nutrients and bioactive compounds on immunological biomarkers.

This Special Issue deals with several examples of nutrients and food ingredients that have shown benefits for human health. Nowadays, there is a big concern about non-communicable diseases, mainly in industrialized countries. Thus, it is necessary to promote research, innovation, and development in this area, acquiring more knowledge to improve human health.
