Message from the Guest Editor

This Special Issue “Liver, Oxidative Stress and Metabolic Syndromes” shed light on different physiological hepatic functions, its several pathologies, and mechanisms. Moreover, it focused on several therapeutic treatments considering different approaches, such as antioxidant, probiotic, prebiotics or a combination of both (symbiotics) substances.

The liver is a vital organ with numerous metabolic functions. It is often subjected to the injury related to overnutrition, obesity and metabolic syndrome. Lipid accumulation in hepatocytes has become one of the most frequent causes of liver abnormalities in Western countries. This pathology can cause histological abnormalities ranging from simple steatosis up to chronic inflammation, eventually, cirrhosis and hepatocellular carcinoma. It is known that many of these disorders are associated with hepatic changes in the enzymatic and non-enzymatic oxidative capacities. Thus, the oxidative stress is one of the most important etiology of different liver disorders.

I encourage you to submit manuscripts that fit with the objectives and topics of this Special Issue.
Editor-in-Chiefs

Prof. Dr. Lluis Serra-Majem
Professor of Preventive Medicine & Public Health, Director of the Research Institute of Biomedical and Health Sciences, University of Las Palmas de Gran Canaria, Spain

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.2 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
