Message from the Guest Editor

Dear Colleagues,

Human milk is not just milk for infants’ specific nutritional requirements. This bioactive and dynamic fluid allows mother–infant signaling beyond lactation, guiding the growth, developmental, and physiological processes of infants. Milk composition varies within mothers. The oligosaccharide composition of human milk is influenced by many factors, such as diet, health, body composition, and geographic residence, and these oligosaccharides are added to formula in varying amounts by different infant formula companies. Papers on both the HMO contents and their influencing factors and the viewpoints of different companies would highlight differences in viewpoints and interpretations in relation to the known facts.

The planned Special Issue will include research from the most recognized names researching topics related to Human Milk, HMOs and Human Lactation, which means that only well-established data will be presented. We are also aiming to cover new and challenging topics within the Special Issue theme.

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases. Full-text available in PubMed Central.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2019).
