Message from the Guest Editors

Dear Colleagues,

Variations in cancer risk and obesity status across populations can be attributed to both heritable factors, as well as modifiable factors, such as diet. Evidence based on observational and experimental studies suggest that diet, whether in food group form, as a single nutrient, or based on diet quality, helps to explain some of the differences observed in patterns of cancer risk and obesity status worldwide. However, if we are to move towards making dietary recommendations that will have a public health impact, we will need to strengthen our evidence base and continue to enhance our understanding on the role of diet (in all forms) on these health outcomes.

In this Special Issue of *Nutrients*, entitled “Food and Nutrient Intake, Diet Quality, Obesity, and Cancer”, we welcome manuscript submissions of original research in humans (epidemiological or experimental) or reviews of the scientific literature on this topic.

Dr. Angela Kong

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.2 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
