Message from the Guest Editors

In this Special Issue, “Nutrition and Aging - Featured Perspectives on Health and Metabolism”, we will present the current research approaches in nutrition research, which aim to better understand both the pathophysiology of nutrition-related diseases, their consequences and therapies. There will be a particular focus on nutrition in older people, in interaction with health and health-related factors, as well as metabolism.

The association of lifestyle and nutrition with health or diseases, as well as dietary regimens in advanced age, role of micronutrients, influence of the nutritional status on therapeutic success, and relevance of teaching and counselling for a healthier society, are highly welcome topics for this issue. We will also accept narrative reviews and systematic/meta-analyses.
