### Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to expand and add research knowledge on the role of diet, including foods, food groups, beverages, nutrients, phenolic compounds, and other dietary compounds, in the prevention of stroke. This issue welcomes original research articles reporting data from epidemiological studies, preferably prospective studies, as well as Mendelian randomization studies, randomized controlled trials, and systematic reviews and meta-analyses. Invited are also manuscripts describing reviews of the scientific literature on nutrition for stroke prevention.

Assoc. Prof. Susanna C. Larsson
