Plant Bioactive Compounds for Health Benefits and Nutrition

Message from the Guest Editors

In this Special Issue of Nutrients, we would like to bring together papers dealing with the topic of plant bioactive compounds for health benefits and nutrition. In broad terms, the study of bioactive compounds and health may focus on different bioactive compounds present in vegetables, their intake, health effects, reduction of disease risk, as well as effects on disease biomarkers.

In fact, dietary factors are related to 4 of the 10 principal causes of death: coronary heart disease, some types of cancer, stroke, type 2 diabetes. Besides, functional foods, which contain components, or bioactive compounds exerting selective beneficial effects on one or more functions of the organism, are widely distributed in the food market. Health claims are important value-added features for consumers and food industry. The EFSA accepts only health claims based on accepted scientific evidence. Therefore, further research is required to provide strong scientific evidence of the association between functional foods containing bioactive compounds and human health.
Editors-in-Chief

Prof. Dr. Lluis Serra-Majem

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases. Full-text available in PubMed Central.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2019).
