## Relevance between Lipid Metabolism, Nutrition and Chronic Disease

Guest Editor:

**Prof. Dr. Harald Mangge**

Clinical Institute for Medical and  
Chemical Diagnostics, Medical  
University of Graz, Graz, Austria

Deadline for manuscript  
submissions:

**5 June 2024**

### Message from the Guest Editor

This Special Issue will address new basic and clinical research data of obesity- and dyslipidemia-related pathologic sequelae as well as nutritional strategies. Obesity and dyslipidemia are responsible for the increasing burden of chronic diseases in the industrialized world. Sessile lifestyle, ingestion of highly processed food, and individual genetic risk constellations contribute to cardiovascular, hepatic, cerebrovascular, and oncologic diseases, all of which are detrimental for a healthy life. A better understanding of the underlying mechanisms is important. The COVID-19 pandemic has indeed shown that metabolic and immunologic dysfunction associated with obesity and diabetes mellitus essentially contributes to fatal courses of COVID-19. This Issue cordially invites all researchers working with such pathologic sequelae of obesity and the relevance between nutrition intaking to submit reviews and original research manuscripts to this topic.

### **Prof. Dr. Maria Luz Fernandez**

Department of Nutritional  
Sciences, University of  
Connecticut, Storrs, CT 06269,  
USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)
