

A Nephro-Nutrition Approach in Patients with Chronic Kidney Disease and Dialysis

Guest Editors:

Prof. Dr. Guillermina Barril

Nephrology Department,
Hospital Universitario La
Princesa, 28006 Madrid, Spain

Dr. Mar Ruperto Lopez

Department of Pharmaceutical &
Health Sciences, Faculty of
Pharmacy, Universidad San
Pablo-CEU, Madrid, Spain

Deadline for manuscript
submissions:

15 July 2024

Message from the Guest Editors

The incidence of PEW increases with the progression of CKD, although the presence of PEW is detected more frequently in dialysis and with a different nutritional profile depending on whether the patient with CKD is on hemodialysis or peritoneal dialysis. In the hemodialysis patient, protein loss is generally not going to be a problem, but the different hemodialysis techniques entail energy consumption that must be carefully monitored, although there may be mixed forms of malnutrition in hemodialysis or peritoneal dialysis, mainly if there is inflammation. The different hemodialysis schemes can modify the protein and fundamental energy requirements of patients. Preventing PEW, correcting inflammation, and adapting the different dialysis schemes together with nutritional intervention with oral nutritional supplements or intradialytic parenteral nutrition in hemodialysis, and the use of protein modules or complete formula without forgetting the supplementation in peritoneal dialysis bags, make the area of nephro-nutrition necessary within the integral care of patients in renal replacement therapy with dialysis.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
