Message from the Guest Editors

Dear Colleagues,

Vitamin A was known, almost 100 years ago, as the ‘anti-infection vitamin’. The important role of vitamin A in the immune system, and how vitamin A can contribute towards better health remained obscure for many decades. In the last decade of 20th century, high dose vitamin A supplementation for children living was introduced in many developing countries as a strategy to reduce child mortality, even though underlying mechanism were not completely understood. Recent research has revealed that the effect of vitamin A on the immune system is complex, and outcomes in terms of health benefits depend on many other factors.

To summarize recent developments in vitamin A, infectious diseases and the immune system, a Special Issue of the journal *Nutrients* is currently inviting papers covering these topics.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
