Message from the Guest Editor

Dear Colleagues,

Vitamins are essential compounds involved in fundamental functions of the body. Vitamins differ in physiological functions and are broadly classified as water-soluble or fat-soluble. The purpose of this Special Issue, “Vitamins and Human Health,” is to provide cutting-edge original research and review articles regarding the diverse properties of various vitamins in disease and healthy living conditions. This Special Issue will discuss the potential role of vitamins on health and disease etiology, progression, treatment, and the recovery from injury and/or surgery. Articles eloquently discussing the various or new determinants of endogenous vitamin levels in disease and non-disease related conditions are encouraged. Submissions discussing the influence of a vitamin or vitamins on physical performance and survival are welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
