Message from the Guest Editors

Dear Colleagues,

Type 2 diabetes mellitus (T2DM) is a complex disease driven by genetic and environmental factors. Among the latter, diet plays a prominent role in T2DM development and progression, evidence suggests the potential of dietetic approaches. Although patients with T2DM are characterized by a plethora of additional metabolic alterations, carbohydrate metabolism still represents the main feature.

Given the latest evidence about dietary and therapeutic approaches, the old “gluco-centric” view of T2DM management is progressively being replaced by a multidimensional approach aimed at minimizing all risk factors for the development of invalidating and life-threatening complications. Considering these layers of complexity, the Special Issue (SI) aims at collecting papers covering different T2DM aspects, with a preference for the effect of dietary approaches for T2DM prevention and management. Manuscripts describing alterations of metabolic pathways, and in particular of carbohydrate metabolism, are also in the SI's scope. Pharmacological approaches targeting specific aspects of T2DM are welcome, as long as they deal with metabolic alterations relevant to the disease.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
