**Message from the Guest Editors**

Dear Colleagues,

Dietary strategies have been shown to successfully treat many chronic conditions; however, to date, less research has been focused on the potential for diet to modulate pain conditions. Emerging data are promising in this respect. As such, this Special Issue seeks submissions with a focus on nutrient effects on pain. This can include research on any chronic pain condition and can deal with areas such as gastrointestinal function, the gut–brain axis, immune function, inflammation, oxidative stress, healing effects of diet, as well as research on how diet affects pain neurotransmission. *Nutrients*, therefore, invites submission of manuscripts of original research or reviews which focus on diet or nutrient modulation of pain.

Dr. Kathleen Holton

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2019).
