Deadline for manuscript
submissions:

closed (1 August 2021)

Message from the Guest Editor

Food hypersensitivities include allergic (IgE-dependent and IgE-independent food allergies) and non-allergic (lactose, histamine, salicylate or synthetic additives intolerance, coeliac disease, non-coeliac gluten intolerance) disorders. Such disorders occur not only among infants and children but also among adults. Treatment involves elimination diets, which can lead to nutritional deficiencies and malnutrition as well as feeding disorders in children.

The aim of this Special Issue of *Nutrients* on "Food Sensitivity: Causes and Management" is to provide information on different forms of food hypersensitivity and different ways of conducting elimination diets. We are in papers covering topics from anaphylactic conditions requiring full elimination of even trace amounts of food to IgE-dependent allergies to milk or egg, in which some patients can be given these products in a baked form.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
