### Message from the Guest Editors

Dear Colleagues,

Studies of global human genomic variation have shown important population-based differences in allele frequencies of common single nucleotide polymorphisms (SNPs) that influence the expression of genes related with nutrition and, secondarily, with chronic disease. Some SNP sites have known functions or associations with diseases or other phenotype characteristics, including nutritional deficiencies and metabolism dietary components. There are many components of human diets that, when combined with the impact of diverse genetics on the metabolism of certain nutrients, have the capacity to give rise to harmful diet–gene interactions. This situation has the potential capacity to modify molecular phenotypes and clinical phenotypes, including human disease. Obesity, diabetes mellitus, chronobiology, osteoporosis, cancer, and many diseases are a field of potential investigation in this topic area. This Special Issue will include manuscripts that focus on the complex relationship between gene polymorphism and nutrition across all physiological and chronic diseases.

Dr. Daniel-Antonio de Luis Roman

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Lluís Serra-Majem**

Professor of Preventive Medicine & Public Health, Director of the Research Institute of Biomedical and Health Sciences, University of Las Palmas de Gran Canaria, Spain

### **Prof. Dr. Maria Luz Fernandez**

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, AGRICOLA, AGRIS, and many other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Food Science*)
