Message from the Guest Editors

Dear Colleagues,

The associations between diet and health are complex, and requires the application of rigorous methods and analysis to describe the nature and extent of the association. The field of nutrition epidemiology has advanced significantly since the initial ecological studies of Ancel Keys and colleagues of dietary determinants of fat and heart disease. Today, researchers are interested in a range of issues including the identification of food / nutrient and disease association in various population groups, development and evaluation of appropriate interventions, the prioritising of services and resources and the potential impact of different dietary patterns on the environment.

The purpose of this special issue is to demonstrate the wide-reaching applications of nutrition epidemiological in the field of public health.

Prof. Dr. Vicki Flood

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
