Message from the Guest Editor

Dear Colleagues,

Stroke is a common cause of death and disability worldwide. Malnutrition is prevalent in stroke rehabilitation patients, and malnutrition has serious negative effects on outcomes. In addition, there is growing interest in new concepts related to malnutrition, such as sarcopenia, frailty, cachexia, chronic inflammation, dysphagia, and oral problems, all of which contribute to poor prognosis.

Therefore, it is necessary to assess nutritional status early and, if needed, provide appropriate nutritional prevention and treatment to maximize improvement in patient outcomes. In addition, multidisciplinary approach is strongly recommended in this setting. To attain these goals, high-quality clinical evidence is needed regarding clinical nutrition in stroke rehabilitation.

The aim of this Special Issue is to update knowledge on nutritional management, including dietary intervention and diet intake, in patients with stroke. All types of manuscripts, including original articles and reviews, are welcome.

Dr. Yoshihiro Yoshimura

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
