## Nutrition and Nutritional Intervention in Chronic Diseases

Guest Editors:

**Prof. Dr. Artur Mazur**

Institute of Medical Sciences,  
Medical College, University of  
Rzeszów, 35-310 Rzeszów,  
Poland

**Dr. Paulina Frączek**

Faculty of Medicine, Department  
of Human Immunology,  
University of Rzeszów, 35-310  
Rzeszów, Poland

Deadline for manuscript  
submissions:

**closed (10 April 2023)**

### Message from the Guest Editors

Dear Colleagues,

Nutrition is an essential issue at every age. Children need proper nutrients to develop and to stay healthy and strong. During the past decade, rapid expansion in a number of relevant scientific fields and, in particular, in the amount of population-based epidemiological evidence, has helped to clarify the role of diet in prevention, treatment, and control of morbidity, as well as premature mortality as a result of chronic childhood diseases. Some of the specific dietary components that increase the probability of occurrence of these diseases in individuals, as well as interventions used to modify their impact, have also been identified.

This Special Issue will include manuscripts that focus on nutrition, diet, nutritional treatment, and/or weight status in relation to chronic childhood disease prevention, control, as well as symptom management. The presented materials are the result of international scientific cooperation of experts specializing in these issues. The content may be useful for clinical practitioners and inspire further innovative research.
