Message from the Guest Editor

Over the last few decades, several “diets” have been suggested to be effective in managing inflammatory bowel disease (IBD) with several landmark papers, especially in the last few years, which have been pivotal in changing our understanding and management of IBD from a nutrition perspective.

This Special Issue on “Advances in Nutritional Management of Pediatric Inflammatory Bowel Disease” aims to provide an overview of the role and importance of nutritional status and available diet therapy in pediatric IBD, the pros and cons of each option, including potential associated costs of treatment and subsequent effect on quality of life, mechanisms of action including proposed modifications of intestinal microbiome, and what the landscape of nutritional interventions in children with IBD over the next few decades will look like.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
